Google Earth
Google
Google Earth lets you fly anywhere on Earth to view satellite imagery, maps, terrain and 3D buildings.

NVivo
QSR International
An all-purpose qualitative data analysis system.

Audacity
Audacity
A free, open source, cross-platform audio software for multi-track recording and editing.

VLC
VideoLAN
A free and open source multimedia player and framework that plays most popular file formats.

Exam Compatibility

Added to List

Illustrator
Adobe

LMS Exam

A white card with a green border. At the top, it says 'Added to List' in green. Below that is the Adobe Illustrator logo (the letters 'Ai' in orange on a black square). Underneath the logo, the text 'Illustrator' and 'Adobe' are displayed. At the bottom, there are two checkboxes: 'LMS' with a checked checkbox and 'Exam' with an unchecked checkbox.

Cloudpaging

A light blue rounded rectangle containing the Cloudpaging logo (a stylized blue cloud with wings) and the text 'Cloudpaging' below it.

Is Exam-Compatible?

Google Earth
Google

Google Earth lets you fly anywhere on Earth to view satellite imagery, maps, terrain and 3D buildings.

NVivo

Enabling student BYOD and meeting strategic IT objectives at the University of Bergen

This app needs to launch in a virtual desktop

Once you're in the virtual desktop, use AppsAnywhere to launch Microsoft Visio.

Windows Virtual Desktop

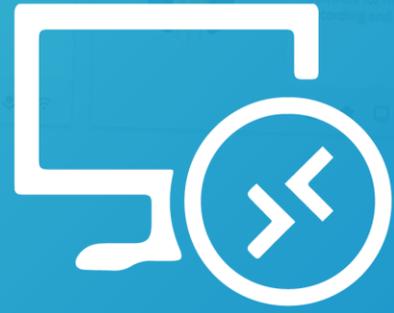

- Link AppsAnywhere to a WVD environment
- Virtual Desktop delivery method
- User is walked through accessing relevant desktop and launching app
- Windows, Mac and HTML5 client supported
- Client install and version management on Windows and Mac
- Managed client setup on Windows

Google Earth
Google
Google Earth lets you fly anywhere on Earth to view satellite imagery, maps, terrain and 3D buildings.

NVivo
QSR International
An all-purpose qualitative data analysis system.

Audacity
Audacity
A free, open source, cross-platform audio software for multi-track editing and recording.

VLC
VideoLAN
A free and open source multimedia player and framework that plays most popular audio and video formats.

App Licenses / New App License

New App License

Select from one of the pre-defined license templates if you are publishing an app from a Packaging Services subscription that supports managed app licensing, or select 'Custom' to create a license to be used by an app you have packaged yourself

Display name *	License expiration *	License template
<input type="text" value="Licensable App"/>	<input data-bbox="749 541 1059 583" type="text" value="31/12/2021"/>	<input data-bbox="1093 535 1406 583" type="text" value="Custom"/>

License data

Key *	Value *	
<input type="text" value="license_key"/>	<input type="text" value="ABCDEF-GHIJKL-MNOPQR-STUV-WXYZ"/>	Remove
Key *	Value *	
<input type="text" value="activation_code"/>	<input type="text" value="1234567890"/>	Remove
Key *	Value *	
<input type="text" value="order_number"/>	<input type="text" value="2020-1846"/>	Remove
<input type="button" value="Add key / value pair"/>		
<p>Please note that license keys can only contain lower case letters and underscores</p>		

Create license

```

#####
#####
##                               MAIN CODE                               ##
##                               EDIT FROM HERE ONWARDS, AS REQUIRED      ##
#####
#####

# Attempt to retrieve the license details
Try {
    # Call the Get-LicenseDetails function to handle retrieval of the license information
    $licenseDetails = Get-LicenseDetails
} Catch {
    # TODO: Handle any errors thrown however you see fit
    # We chose to write to the error stream and exit with a non-zero code
    Write-Error "Error in retrieving license details. Error was: '$PSItem'"
    Exit(1)
}

###

# Once you have access to all of the required license information, you can begin the process of actually licensing the app
# This is the main part you will need to customize, depending on how your app is licensed.
# The following example shows running an external process and passing arguments in order to license an app

# Execute a process and provide the required arguments
# Be sure to use -PassThru -Wait arguments to ensure the script doesn't continue until the process executes
$process = Start-Process license_activator.exe -WindowStyle Hidden -ArgumentList "$($licenseDetails.LicenseData.license_key)" -PassThru -Wait
Write-Debug "Application Licensing process exited with code: $($process.ExitCode)"

# Check the process' exit code to determine whether or not it succeeded
If ($process.ExitCode -eq 0) {
    Write-Debug "Application was licensed successfully"
} Else {
    Write-Error "Application Licensing Failed. Process exited with code: $($process.ExitCode)"
    Exit (1)
}

#####
#####
##                               END OF CODE                               ##
