# Ensure continuity of education by **making your existing PC labs** accessible to students **off-campus.**

COVID-19 is impacting universities and colleges across the globe. Maintaing your educational offerings is becoming increasingly difficult as campuses close. Enable 'online learning' by giving students access to their specialist lab PC software off-campus and at home, so you can ensure continuity of education.

# Make your existing lab PCs remotely accessible off-campus.

Make your lab software available off-campus

Students usually need to go to specialist campus labs to get the software they need. Give them access to lab PCs off-campus so they can continue to get their work done.
Rapid deployment, in as little as 48 hours

With campus closures imminent, it's important to deliver apps off campus quickly. We'll convert your existing campus PC labs so students can access them wherever they are.

We'll handle the installation and set-up remotely

We'll take care of installation from our side remotely, without needing to come and visit you on campus. We'll give you all the help and advice you need along the way, too.

Use any personal device to access lab PCs, anywhere, anytime

Our solution makes your existing lab devices accessible remotely

Students/staff can get existing lab software apps off-campus

Software2

Convert your unused campus lab PCs into remote desktops.

____

We've put together a solution to help students and staff remotely access unused, on-campus lab computers and installed software.

We help you turn your existing campus lab PCs into remote desktops in around 48 hours, and give end-users access to the apps they need to learn and teach.

Throughout the COVID-19 pandemic, it's likely that your students and staff will be working at home full-time. Most universities and colleges will have lots of unused labs on-campus and hundreds (or thousands) of PCs not being used.

We'll use our remote desktop solution to help you turn each of your campus PCs into remotely accessible machines, available to students and staff off-campus.

Think of it like a temporary VDI solution, while nobody is on campus. Your powerful lab machines and licensed software apps are there ready to be used, so make the most of them by providing secure, off-campus access
